No. of Pages: 15  
(including cover)

Per your request at our meeting yesterday I have prepared the following materials for your review.

1. An annotated agenda for the October 1, 1997 Water Quality Technical Group Meeting.
2. An overhead for use during my discussion of Action Strategies and Potential Tools to Assess the Effectiveness of Action Strategies at the October 1, 1997 WQTG Meeting.
3. A detailed response to Contra Costa Water District's letter dated August 15, 1997 from Richard Denton regarding TDS, chloride, and salinity as well as many other topics. Upon careful review of the Water Quality Parameter Assessment Team recommendations, the Water Quality Control Plan (1995) and the CUWA recommendations it seems that the values recommended by CCWD are consistent. It should be noted that the water quality values regarding TOC (<3 ug/l) and bromide (<50 ug/l) are not addressed by the Water Quality Control Plan (1995) or the CCWD comments, therefore, they remain as provided by CUWA. I am fully prepared to discuss these issues with CCWD should they arise during the October 1 meeting.
4. Per our discussion of the need for a senior drinking water quality expert that is well known and highly respected in the industry, I am sending you the resumes of two individuals within Montgomery Watson. Both Carol Tate and Mike Price have an in-depth understanding of drinking water quality issues and are highly respected in the drinking water field. I would be happy to arrange a meeting with them, should you be interested.

Per your request, I checked my files for minutes from the August 6 meeting. It does not appear that I ever received a copy in the mail, so the rest of the WQTG probably did not either. I would be happy to provide you with a copy of the August 6 minutes that we prepared after the meeting, should you need them.

*If you do not receive all pages, or if there are any problems with this transmission, please call 916 924 8844.*

D-043906

I am revising the Action Strategies write-up based on more than 50 stakeholder comments and am incorporating the project proposals that we received earlier this year, per our discussion, in order to increase the specificity of the actions for the October 1 WQTG meeting. I will provide this to you as soon as possible so that you may review it before the October 1 meeting.

Per our discussion I am also doing the following:

- Reviewing the 19 technical reports that you provided to me yesterday for their accuracy with regard to the CALFED Water Quality Program.
- Summarizing all stakeholder comments received since January 31, following the same format that was used for the comment summary produced on March 24, 1997.
- Summarizing G. Fred Lee's comments and providing responses where appropriate.
- Revising the Potential Tools table for handout at the October 1 WQTG Meeting.

*If you do not receive all pages, or if there are any problems with this transmission, please call 916 924 8844.*
